

Scenario:

You are a college student at the University of South Carolina and must manage a job along with classwork. You want to put everything you want to add every activity you have for the next week.

Task 1:

Add the 3 assignments that you had and also add the work times that you have for the week.

Task 2:

Email the teacher about the assignment you had to make up.

Task 3:

Change the profile picture on your Assignment Tracker.

Three Things to change:

1. Include more details on the profile page.
2. Give the calendar multiple views. For example, give the ability to zoom in on a specific week instead of the whole month.
3. Space out the home page more instead of everything on one side.

Three things that could stay:

1. The messaging system has a good look and is clear.
2. When adding things to do, it is clear and easy to add things on the calendar.
3. The bottom bar on the app with features is a good touch and clear for the user.
